## INTRO

I am an Assistant Professor working with the Department of Civil and Environmental Engineering at The Hong Kong University of Science and Technology. My current research is about the application of artificial intelligence in smart building and low carbon city, majorly from two aspects. First, I am looking at how to leverage advanced control techniques (e.g. Reinforcement Learning, Model Predictive Control, etc.) to enhance building performance and building-grid interaction. Second, I am interested in how machine learning techniques could help to inform decision making on buildings and cities.

Prior to joining HKUST, I was a scientist in Lawrence Berkeley National Laboratory working on smart building control; a Postdoctoral Scholar in UC Berkeley working on data-driven personal comfort models and devices; and an Energy Consultant in World Bank working on Urban Scale Building Energy Efficiency and Renewable Energy in China.

I published 74 articles in SCI journals, 23 as first author, 6 as corresponding author, 5 as co-first author, 2 as ESI highly cited paper. I was awarded the **National Science Fund for Excellent Young Scholars** (2021), **Second Class Award of State Science and Technology Prize** (2019); and was selected as a Schwarzman Scholar (2016, [covered by the New York Times](#)). I am now serving as an Section Editor for Energy and Buildings, and Subject Editor for Building Simulation (SCI journal) and Building Energy Conservation (Chinese journal), as an Associate Editor for Frontiers in Built Environment (SCI journal), and is a [Fellow](#) of the George H. W. Bush Foundation for U.S.-China Relations. I have won the first prize in the **2022 Global AI Challenge for Building E&M Facilities** hosted by Hong Kong Electrical & Mechanical Services Department. Because of my achievements, I was invited to give a speech on the Seventh-Round High-level Consultation on U.S.-China People to People Exchange, chaired by U.S. Secretary of States John Kerry and Chinese Vice-Premier Yandong Liu, as the *only representative of Chinese young scholar* ([news coverage](#)).
